CLOUD RANGE

Cyber Range

The world's most advanced security teams depend on Cloud Range's customized, secure, cloud-based cyber range training platform to hone their skills. CloudRange provides cybersecurity teams with access to the worlds leading cyber range platform.

CIRCADENCE

Gamified Learning

Project Ares® by Circadence is an immersive, gamified cybersecurity training platform that helps novice and seasoned cyber professionals keep their skills sharp against evolving cyber threats. The platform uniquely combines machine learning, single-and multi-player exercises, and offensive and defensive missions that mirror real-life scenarios.

Identity & Access Management

- Current state assessment
- IAM Framework
- Segregation of Duties
- Use Case Definition
- Role Based Access Control
- IAM & PAM Vendor evaluation and selection

Risk & Compliance

- Risk Management Frameworks (ISO31000, NCRMF, NIST etc.)
- Regulatory Compliance
- Policies & Procedures
- Integrated Risk Management
- ISO27001 & ISO 22301 Certifications

Security Strategy

- Align business & security objectives
- People, Process & Technology
- Optimize investments in security
- Quick Wins VS Long Term Plans

Data Security & Privacy

- Information Classification (Structured & Unstructured)
- DLP & Rights Management Policies
- Data Privacy Impact Assessments
- Data Governance Model
- Data Security Awareness

UNIFIED COMPLIANCE FRAMEWORK®
The Science of Compliance.™

Unified Compliance

Unified Compliance's Common Controls Hub, helps compliance professionals keep pace with the ever-evolving regulatory demands, confidently manage risk, and ease resource and budget barriers. The UCF is the world's largest library of interconnected compliance documents.

Application Security

- Threat Modeling
- Static Code Analysis
- Dynamic Testing

Infrastructure Security

- Secure

- Discover

Incident Response

- SOC Policies & Procedures Development
- SOC CMMI Maturity Assessment
- SOC Certification (ISO 27001:2013)
- Cybersecurity Drills / Simulations
- Red Team / Blue Team exercises
- Incident Response / Forensics Services Retainer

Vulnerability Management

Security Vulnerability Management Centre (SVMC) is a centralized repository for documenting and managing findings arising out of your security assessments. SVMC helps security teams focus on finding & remediating vulnerabilities rather than on documentation and tracking.

Crowdsourced Testing

Synack is a security company revolutionizing how enterprises view cybersecurity: through a hacker's eyes. Synack's private, managed hacker-powered security solution arms clients with hundreds of the world's most skilled, highly vetted ethical hackers who provide a truly adversarial perspective to clients' IT environments.
