

Comprehensive Digital Security

Imperva solutions stop bad actors, whether before they enter your network or at your critical applications, APIs, or data stores. Our mission is to keep everything secure, protect what matters most, and ultimately, make your organization impervious.

We protect a diverse range of organizations across various industries, speaking to the versatility and effectiveness of our solutions. As a customer-obsessed company, we are driven by our commitment to make the world safer.

Application Security

Block attacks to your applications and APIs with precision, powered by Imperva's SOC

Data Security

Advanced analytics and automated response to prevent malicious data access

Network Security

Guarantee mitigation of DDoS and DNS attacks at the edge, with industry leading 3-second SLA

Application Performance

Improve customer experience of websites making them 50% faster and more resilient

Our customers praise the **value we deliver**

"After installing Imperva, this is the first time in ten years where we didn't reach our threshold and have any downtime."

Shaun Clark

Head of Infrastructure
Betfred

"We're paying a small price to avoid lost business and bad customer experience."
