

Experience-First Networking

Maximize user and IT experiences with secure client-to-cloud automation, insight, and AI-driven actions.

The pillars.

End-User Assurance

Visibility all the way down to the individual client, application, and session to optimize user experiences.

Built for Cloud

Manage devices across multiple instances. Plus, cloud-hosted operations for troubleshooting, feature delivery, trending analysis, and reporting.

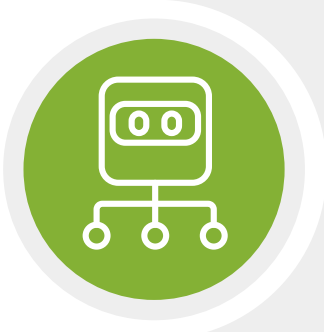

Proactive Automation

Automated operations and proactive problem solving allows IT to focus on long-term network issues over day-to-day troubleshooting.

Connected Security

Threat-aware networks detect and stop advanced threats across the network at every point of connection.

The products and solutions.

AI-Driven Enterprise Portfolio →

Juniper's wired, wireless, network access control, and SD-WAN solutions are all driven by Mist AI. They leverage best-in-class AIOps for client-to-cloud automation, insight, and assured actions that deliver the following unique attributes.

Differentiators

- Set, monitor, and enforce service levels across LAN, WLAN, and WAN
- AI-driven actions through Self-Driving Network™ remediation
- Marvis: The only AI-driven Virtual Network Assistant™
- Anomaly detection to quickly identify and fix new issues

Automated WAN →

For linking different offices and data center facilities with reliable connectivity.

Differentiators

- Agility for the unknown with virtually endless use case versatility and flexible bandwidth on-demand.
- Closed-loop automation that translates business intent into service performance.
- Threat-aware by design with the industry's first and only platform to deliver routing and advanced security services, all in one.
- Experience-first development

Cloud-Ready Data Center →

For simplified underlay/overlay management with intent-based automation and assurance.

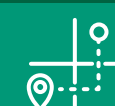

Differentiators

- A world-class portfolio of data center switching
- One unified, multivendor solution for automation and assurance
- A best-in-class open-source SDN overlay
- Zero Trust data center

Experience-First Networking means real results.

<p>1 servicenow</p> <p>Maximized employee productivity for ServiceNow by eliminating over 90% of all user-generated Wi-Fi tickets.</p>	<p>2 Brought precision wayfinding and reliable guest Wi-Fi to the Orlando VA's 1.2 million square-foot medical facility.</p> 	<p>3  City of Philadelphia</p> <p>The City of Philadelphia implemented a threat-aware Juniper network to reduce risk and empower both city workers and visitors with superior smart city services.</p>
<p>4 Delivered 30% in OpEx savings for a national healthcare system by switching them from MPLS to centrally managed Juniper SD-WAN.</p>	<p>5 Reduced deployment times for a major web services company from two weeks to two hours with automated data center operations.</p>	<p>6 Ensured customers for a major telco company could quickly and reliably transfer data between phones for new purchases across 2,400+ retail locations.</p>

Experts are taking notice too.
