

Recorded Future Intelligence Cloud

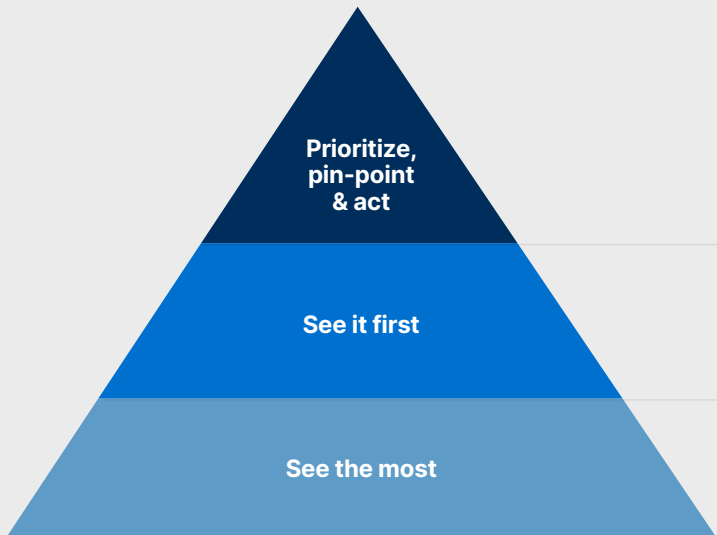

Get Ahead of Present and Future Attacks

Organizations and defenders face significant challenges: growing tech stack complexity, unrestrained and motivated threat actors, and an overwhelming volume of alerts. Unfortunately, threat intelligence is often overlooked, leaving current detection-based security architectures insufficient and vulnerable.

Modern defense starts with a different approach to threat intelligence

We enable you to get ahead of present and future attacks

Remediate incidents before they impact your business complexity	64% of clients have a significantly better understanding of their threat landscape
See threats before they turn into attacks on your environment	65% increase in speed to identify a new threat
See all threats, no matter the threat actor, their motivations, techniques, or targets	73% increase in comprehensive threat visibility

Recorded Future Intelligence delivers the most comprehensive and unbiased threat intelligence across cyber, supply chain, physical, and fraud domains.

5B Intelligence Cards	4k threat actors tracked	1.3M novel exposed login credentials per day
50B entities	90k validated C2s actively monitored	30M domains and URLs scanned daily for domain abuse
