

SailPoint Identity Provisioning for Workforce Continuity

Globally, businesses are confronting the new norm of a remote workforce, which requires more thoughtful identity provisioning solutions.

As workers access systems and files remotely, being able to securely grant access in near-real time can **prevent gaps in workflow, improve productivity, drive best practices, and improve compliance.**

5.2%
of US professionals
work remotely¹

One-fourth
of home-based workers
were in management,
business, and financial
occupations³

Globally,
70 percent
of professionals work
remotely at least one
day a week;

53 percent
work remotely for at
least half of the week²
