

SafeNet Access Management and Authentication Solutions

Prevent breaches, secure cloud migration and simplify compliance

Cloud-based applications play a vital role in fulfilling productivity and operational needs in the enterprise. However, as new services are added to an organizations' cloud estate, it becomes more difficult to gain unified visibility into cloud access events, more complex to comply with regulations and more onerous for users to remember multiple credentials. And with cloud applications protected, by default, only with weak static passwords, the risk of a data breach rises.

Thales's award-winning suite of SafeNet Access Management and Authentication solutions allow organizations to effectively manage risk, maintain regulatory compliance, gain visibility into all access events and simplify the login experience for their users.

Utilizing policy-based SSO and universal authentication methods, enterprises can securely move to the cloud while maintaining access controls to all corporate resources, regardless of the device being used.

Prevent breaches

Deter unauthorized access and apply universal authentication methods for all apps

Enable cloud transformation securely

Transform your business and operate securely by applying consistent access policies to all on prem and cloud apps

Simplify the login experience

Make it simple for users to log into multiple apps with cloud SSO, elevating trust only when needed

Simplify compliance

Remain compliant as you grow your environment by setting policies that adapt to new regulations

Industries We Address

 Government	GDPR, PSN, CJIS-SP
 e-Filing Public Services	eIDAS, MCA-21
 Healthcare	HIPAA, HITRUST, EPCS
 Financial Services	FISMA, FFIEC, PCI DSS
 Critical Infrastructure	NERC
 Telecom and Service Providers	
 Manufacturing	
 Enterprise and More!	

Use Cases We Secure

 Cloud SSO	 SaaS & Cloud
 Web Portals	 Digital Signature
 Local Network Access	 VDI
 Physical/Logical Access	 Endpoint Protection
 Remote Access	 Email Encryption

Products We Offer

Access Management

SafeNet Trusted Access

Authentication Methods

 PKI	 Hardware	 3rd Party	 OTP Push
 Kerberos	 Pattern Based	 Voice	 Biometric
 Google Authenticator	 SMS	 eMail	 Password
 Passwordless	 Fido		

Standards-based Security

Thales's SafeNet Access Management and Authentication solutions offer unparalleled standards-based security:

- FIPS 140-2 validated software and hardware tokens
- Common Criteria certified hardware tokens
- FIDO2 and U2F level 1 certification
- ISO 27001:2013 accreditation
- AICPA SOC-2 recognition
- DSKPP-secured provisioning of software tokens
- ANSSI certified libraries within software tokens
- Hardware-based root of trust
- Field-programmable tokens

About Thales

The people you rely on to protect your privacy rely on Thales to protect their data. When it comes to data security, organizations are faced with an increasing number of decisive moments. Whether the moment is building an encryption strategy, moving to the cloud, or meeting compliance mandates, you can rely on Thales to secure your digital transformation.

Decisive technology for decisive moments.
