

Why Tripwire?

The Industry's Most Trusted Cybersecurity and Compliance Tools

Imagine becoming more effective and efficient at securing your infrastructure. Tripwire has always been the leader in file integrity monitoring (FIM) and change control, but we offer much more.

Our solutions provide effective security, continuous compliance and reliable operations for enterprises, industrial organizations, service providers and government agencies.

- » Log management
- » Change detection
- » Configuration assessment
- » Policy management
- » Vulnerability management
- » Asset discovery
- » Network device and SCADA security
- » Factory automation system security

Tripwire Capabilities

Our solutions portfolio includes the following capabilities to support your organization's cyber integrity and alignment with wide-ranging industry-standard frameworks and regulations:

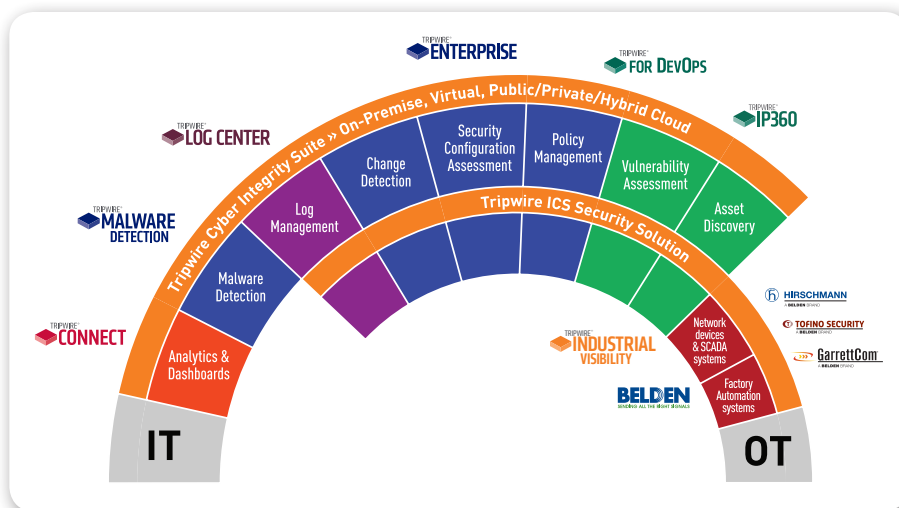

- » File integrity monitoring
- » Security configuration management
- » Analytics and dashboards
- » Malware detection

Tripwire's Product Portfolio

With a portfolio built on maintaining the most critical cybersecurity practices at the highest standards, we deliver the technology and expertise to stay on top of unauthorized changes, vulnerabilities and weaknesses, and drifts away from your security policy.

Tripwire protects the world's leading organizations against the most damaging cyber attacks. Our solutions work on-site and in the cloud to find, monitor and minimize a wide range of threats without disrupting daily operations or productivity. Think of us as the invisible line of defense that keeps systems safe.

Tripwire solutions combine essential capabilities that deliver breach detection, remediation and compliance, while addressing nearly every compliance standard—PCI DSS, NIST, FISMA, NERC, HIPAA, DISA, ISO/IEC 27002, SOX and many others.

Tripwire® Enterprise pairs the industry's most respected FIM with security configuration management (SCM) to provide real-time change intelligence and threat detection. For the compliance officer, it delivers proactive system hardening and automated compliance enforcement—resulting in a reduction of audit cycles and cost.

Tripwire IP360™ proactively discovers, profiles and assesses the vulnerability risk of your organization's assets and can stand as the fundamental solution of your vulnerability management (VM) program. It enables fast detection of vulnerabilities, granular prioritization of risk and remediation management.

Tripwire Log Center™ provides secure and reliable log collection to add real-time intelligence to machine data, with security analytics and forensics for rapid incident detection and response. It readily integrates with your existing infrastructure and includes a growing library of available correlation rules.

Tripwire for DevOps integrates into your organization's CI/CD pipeline to provide seamless pre-deployment assessment of images. Tripwire for DevOps discovers vulnerabilities, misconfigurations and policy violations in containers and virtual images, returning results directly back into development tools.

Tripwire Malware Detection extends the capabilities of Tripwire Enterprise with fully integrated detection of known and zero-day exploits through deep file inspection and analysis.

Tripwire Industrial Visibility lays the foundation for industrial cybersecurity by discovering the assets present in

industrial environments. Protect your industrial control systems (ICS) from cyber events that threaten safety, productivity and quality.

Tripwire ExpertOpsSM delivers a cloud-based managed services model of the industry's best SCM and VM. A single subscription includes personalized consulting from trained experts and hands-on tool management to help you achieve and maintain compliance and critical asset security.

Tripwire also offers an additional range of services such as penetration testing, industrial cybersecurity assessments, IoT and medical device assessments, and a rich array of apps and integrations you can use to optimize your cybersecurity program.

Better Together

While each product in the Tripwire portfolio provides valuable capabilities in a stand-alone implementation, customers receive maximum value when they are integrated—with each other or with third-party products—to achieve faster and more accurate security and compliance in both IT and OT environments.

Tripwire integrates with a wide array of third-party products to offer a multitude of benefits and use-cases in these distinct categories:

- » Threat intelligence
- » Network security
- » Analytics and security information and event management (SIEM)
- » IT service management (ITSM)
- » Integrated access management (IAM)
- » Industrial control systems (ICS)

Tripwire Enterprise Wins Two SC Media Awards:
Best Risk Management/
Regulatory Compliance
Solution *and* Regulatory
Compliance Tools and
Solutions |

Tripwire IP360 Earns 5-Star Rating for Vulnerability Management

★★★★★

— SC Media

- » Factory automation systems (FAS)
- » Government risk compliance (GRC)
- » DevOps workflow tools

You'll gain a significant advantage against operational inefficiencies with Tripwire integrations. These integrations automate the sharing and validating of critical data and intelligence, and drive productivity by enabling richer collaboration between your IT operations and security teams.

Summary

Tripwire provides the advanced foundational controls that should serve as the bedrock for your security and compliance efforts. With the bonus of integration and automation, our solutions further enhance operational efficiency and threat response. Known and trusted, we keep complex digital systems protected in a world of unknowns.

Tripwire is the trusted leader for establishing a strong cybersecurity foundation. Partnering with Fortune 500 enterprises, industrial organizations and government agencies, Tripwire protects the integrity of mission-critical systems spanning physical, virtual, cloud and DevOps environments. Tripwire's award-winning portfolio delivers top critical security controls, including asset discovery, secure configuration management, vulnerability management and log management. As the pioneers of file integrity monitoring (FIM), Tripwire's expertise is built on a 20+ year history of innovation helping organizations discover, minimize and monitor their attack surfaces. **Learn more at tripwire.com**
